# SOLAR TRACKING ACTUATORS

Joyce Solar Actuators are designed to precisely position smaller solar tracking equipment. Their robust and efficient DC motor (24V or 36V) keeps power consumption to a minimum. Travel speeds remain nearly constant regardless of the load. Ideal for rugged environments common to the solar industry, these cost-effective solar actuators have an IP65 protection rating. Self-locking features in the mechanism ensure that the solar actuators can be held in position throughout the daily tracking cycle.

Each solar actuator is lubricated for life and includes an adjustable clevis that allows the unit to be appropriately positioned for the particular application.

## Specifications

- Double clevis mounting for easy installation
- Clutch for overload protection
- Adjustable limit switches for flexible travel settings
- Reed sensor digital feedback for accurate positioning
- Duty cycle is 25% (4 min. running, 12 min. rest)
- IP65 rating provides protection against outdoor conditions
- Lubricated for life to reduce maintenance costs

## Options

- Available in 24V and 36V
- Three stroke lengths – 450 mm (18 in), 600 mm (24 in), 900 mm (36 in)
- Trunnion or end clevis mounts available

Dimensions and ordering information are on the back of this brochure.

# SOLAR TRACKING JACKS

---

Joyce Solar Jacks are specifically designed for heavy-duty solar tracking applications. Available in machine screw and ball screw models, these cost-effective and efficient jacks precisely position loads at speeds typical of solar tracking operations.

Configurations are available to meet individual customer tracking and positioning requirements. These jacks are designed for outdoor applications and built to stand up to environmental challenges found at solar installations around the world.

## Specifications

- Cast aluminum housing provides superior corrosion resistance
- Up to 48 inches of travel, can be customized to your requirements
- Integral trunnion provides for simplified mounting and installation
- Optimized drive efficiency for lower power consumption
- Low maintenance for reduced operating costs
- Stainless steel clevis provides corrosion-resistant end condition
- Bellows boot provides protection for the screw

## Options

- AC or DC motor
- Position sensor
- Limit switch
- Customized jack solutions

# SOLAR TRACKING JACKS (STM) – MACHINE SCREW JACKS

These self-locking, solar tracking jacks are designed to precisely position loads at speeds up to 3.75 inches per minute.

STM – Machine Screw Jacks		
Part Number	Typical Dynamic Load Capacity*	Typical Static Load Capacity*
STM-2	4,000 lb.	4,000 lb.
STM-5	10,000 lb.	10,000 lb.
STM-15	30,000 lb.	30,000 lb.
STM-30	60,000 lb.	60,000 lb.

\*Actual load capacities may vary depending on desired life and travel speed requirements.

Trunnion pins should be made of steel with hardness greater than 30 HRC, yield strength greater than 110 KSI, and supported within 1/16 inch of the actuator housing.
