

Position Title: Application Engineer

Summary Description:

Leading manufacturer of mechanical jacks is seeking a creative and hard working application engineer who has the ability to fully comprehend product specifications and innovate designs required to meet those specifications. Knowledge of mechanical power transmission equipment and electrical control systems is a plus.

Duties:

- Prepare quotations for products and systems to meet customers' requirements.
- Provide quotation follow-up as required.
- Provide technical support for customers, internal staff and external sales force.
- Develop pricing for lifting systems and specialty linear positioning equipment.
- Ensure that final product designs meet customers' specifications.

Key Role Interactions:

- Interact with customers, customer service, external sales force, design engineering, and manufacturing personnel to support customers' requirements.
- Report to the Application Engineering Supervisor.

Qualifications / Professional Skills:

- Bachelor's degree in Mechanical Engineering or Mechanical Engineering Technology.
- Excellent customer service skills.
- Able to control multiple projects simultaneously.
- Strong analytical and problem solving skills.
- Ability to effectively communicate technical concepts verbally and in writing.
- Strong computer skills (MS Office, AutoCAD).
- Self-motivated and driven.
- Able to work independently and in a team environment.
- Travel up to 10%.
- Knowledge of the Epicor ERP system is a plus.
